

# *Voices from the classroom*

*The relationship between a new science teacher's  
pedagogic beliefs and classroom practices*

## **Acknowledgements**

*I would like to express my gratitude to the school, the science department and its teachers who generously allowed me to participate in the everyday events of school life.*

*A special thanks to Lilly Bashe for her sustained interest and enthusiasm for the research process. The involvement of Lilly and her students made this project possible!*

*I am also indebted to the Applied English Language Studies Department of the University of the Witwatersrand for housing the Setlhare Science Curriculum Trust's research project. I am especially grateful for the intellectual rigour and ongoing support of Professor Esther Ramani and Dr Susan Van Zyl of the Applied English Language Studies Department and Mr Peter Moodie of the Setlhare Science Curriculum Trust.*

*Patricia Watson*

# Table of contents

## **Chapter 1 The background to the research project**

A	Introduction	1
B	Rationale informing the Setlhare Science Curriculum Trust's (SSCT) teacher professionalisation research project	1
C	Aim and objectives of the SSCT's teacher professionalisation research project	3

## **Chapter 2 Background to the research method**

•	Research instruments	3
•	Research site rationale	3
•	Description of research site	4
•	Description of research setting	4
•	Research participants	4
•	Brief overview of the research process	5
	<i>Stage 1: Biographical description of teacher's beliefs about teaching and learning, representing Chapter 3</i>	
	<i>Stage 2: First science lesson reflection workshop, representing Chapter 4</i>	
	<i>Stage 3: Second science lesson reflection workshop, representing Chapter 5</i>	

## **Chapter 3 Biographical description of teacher's beliefs about teaching and learning**

	Method and rationale	9
	Description of teacher's pedagogic framework	9
1	Teacher's educational and professional background	9
2	Teaching subjects without the necessary content expertise	10
3	Teacher's early learning experiences	11
3.1	Transmission and assimilation	
3.2	Extrinsically motivated learning	
3.3	How teacher-student interpersonal relationships impact on student performance	
4	Early teaching experiences: from transmission learning to transmission teaching	12
5	Changing early conceptions of pedagogy: breaking the transmission teaching and learning mould	12
5.1	Transmission of information does not guarantee learning	
5.2	Challenging corporal punishment as a means of motivating learning	
5.3	Developing an understanding of collaborative pedagogy	
5.3.a	Group work	
5.3.b	Disadvantages of group work	
5.3.c	Advantages of group work	
5.4	Developing an understanding of active learning	15
5.4.a	Building on students' background knowledge and personal experiences	
5.4.b	Talking to learn	
5.5	Personal qualities of good and poor learners	16
5.6	Teacher's role as socialiser and educator	17
6	Discussion	18

## Chapter 4 First science lesson reflection workshop

1	Method and rationale	19
2	Context of Elements and Compounds lesson	19
3	Content of Elements and Compounds lesson	20
4	Evaluation of the Elements and Compounds lesson in relation to the teacher's personal pedagogic framework	21
4.1	Teacher's initial response to Elements and Compounds lesson transcript	
4.2	Purpose of lesson	
4.3	Science content-related difficulties	
4.4	Role of teacher	
4.5	Role of learners	
4.6	Classroom tasks	
5	Lessons learned	31
6	Discussion	32
7	Putting the teacher's beliefs into practice	33
7.1	Method and rationale	
7.2	Pedagogic action plan: aims and objectives	

## Chapter 5 Second science lesson reflection workshop

1	Context of Electricity lesson	35
2	Content of Electricity lesson	36
3	Evaluation of Electricity lesson in relation to teacher's pedagogic action plan: aims and objectives	38
3.1	Teacher's response to Electricity lesson transcript	
3.2	Purpose of lesson	
3.3	Recall of prior learning	
3.4	Role of teacher	
3.5	Role of learners	
	Student questionnaire	
3.6	Classroom tasks	
3.7	Content management	
3.8	Time constraints and syllabus pressure	
4	Lessons learned	54
5	Discussion of the second reflection workshop	56

## Chapter 6 Conclusions and implications

6.1	Key outcomes	59
6.2	Implications for further research	61

## Bibliography

## Appendices

Appendix 1: Classroom Floor Plan

Appendix 2: A section of the Elements and Compounds chapter from the **Science for all** Standard 6 draft textbook

Appendix 3: A section of the Electricity chapter from the **Science for all** Standard 6 draft textbook
